EconomicBridge — Partnership Revenue-Share Framework

Bizra Farms Integrated Nigeria Ltd · July 2026 · All figures in USD

Confidential — internal negotiation framework. Not legal advice; definitive agreements to be drafted by counsel.

1. Principles (non-negotiable)

1. **Institutional, never personal.** Revenue shares flow to the partner *institution* under a formal MOU/PPP — never to an individual official. This protects everyone (ICPC/EFCC exposure) and makes the deal durable beyond any one officeholder.

2. **IP stays with Bizra.** Partners receive usage, deployment, and (where agreed) co-branding rights — never ownership of the platform, models, or data pipelines.

3. **Share NET revenue, not gross.** Net = collected revenue minus direct delivery costs (cloud infrastructure, SMS/data pass-through, payment fees, third-party data licences). Target net margin on subscriptions: 65–80%.

4. **Pay on collection.** Shares are calculated and remitted quarterly on cash actually received — never on invoiced amounts (government receivables can run 90–180 days).

5. **No broad exclusivity** unless tied to a guaranteed minimum annual revenue commitment.

2. Partner roles and share bands

Partner role	What they actually do	Share of NET revenue on deals they enable
Introducer	Warm introduction only; Bizra runs the sale	**5–10%**, year 1 only
Facilitator	Introduction + actively champions procurement to signature	**15–25%**, years 1–2, then 10%
Strategic partner (e.g. a space or science agency)	Market access + institutional endorsement + procurement pathway + ongoing sponsorship	**25–35%**, life of the contracts they enable
Data contributor	Supplies satellite data/ground-truth that materially improves the product	**+5% royalty** on affected modules, stacked on any role above
Reseller / ECOWAS country partner	Sells, localises, first-line support in their market	**30–40%** of net in their territory

Deals Bizra sources independently: 100% Bizra (or ≤10% courtesy share if a partner's brand was material to the win).

3. Worked example (Strategic partner at 30%)

Federal Enterprise licence at **$200,000/yr**, enabled end-to-end by the partner:

Line	Amount
Gross collected	$200,000
Direct delivery costs (cloud, SMS, data, payment fees ~20%)	–$40,000
Net revenue	**$160,000**
Partner share (30%)	**$48,000**
Bizra retains	$112,000

Five such contracts = $240k/yr to the partner institution, $560k/yr to Bizra — a real, defensible PPP story for both sides.

4. Governance & compliance

- **Steering committee:** 2 seats Bizra, 2 partner; meets quarterly; reviews pipeline, revenue statements, disputes.
- **Transparency:** partner receives quarterly revenue statements for deals in scope; annual reconciliation audit right (partner's cost).
- **Procurement law:** federal PPPs via **ICRC**; procurement via **BPP**; states/parastatals via their procurement rules. No shortcuts — a non-compliant award is a voidable award.

- **Anti-corruption:** both parties warrant compliance with the Corrupt Practices Act and ICPC/EFCC regulations; any facilitation payment voids the agreement.
- **Data sovereignty:** Nigerian government data stays under Nigerian jurisdiction; NDPR-compliant processing.

5. What Bizra brings vs. what partners bring (the negotiation logic)

Bizra (keep majority)	Partner (earn share)
Built, deployed, satellite-fed platform (7 modules, per-LGA, provenance)	Market access + credibility
ML models + ingestion pipelines (Sentinel, FIRMS, VIIRS, WorldPop)	Procurement pathway
Hosting, operations, support, roadmap	Institutional endorsement
All capital risk to date	Optional: data, ground-truth, distribution

Access is valuable but replaceable; the platform is not. **Anchor at 25%, concede to 35% only for a strategic partner who signs a minimum-revenue commitment.**

6. Term sheet defaults

- Term: 3 years, renewable; either party may exit with 90 days' notice (earned shares survive on existing contracts).
- Disputes: negotiation → mediation (Lagos) → arbitration (Nigerian Arbitration and Mediation Act).
- The revenue share applies to **licences and subscriptions**; professional services and donor-funded deployments are shared only if the partner sourced the program (Facilitator band).

Next step: convert this framework + the Pricing Sheet into a lawyer-drafted definitive agreement once a specific partner and deal scope are known. See EconomicBridge_PPP_MOU_Template.md for the opening document.
