P.M.B 401, Abuja, Nigeria

**PROPOSAL FOR PARTNERSHIP: REGIONAL DEPLOYMENT OF THE ECONOMICBRIDGE
SATELLITE INTELLIGENCE PLATFORM FOR FOOD SECURITY, DISASTER EARLY WARNING
AND REGIONAL RESILIENCE**

Your Excellency,

On behalf of **Bizra Farms Integrated Nigeria Limited**, I write to propose a partnership with the ECOWAS Commission. We build and operate satellite and artificial intelligence systems that turn live earth observation data into early warnings and decision support, and we believe this capability can serve the Community's goals in food security, disaster preparedness and regional integration.

EconomicBridge is a multi tenant satellite intelligence platform, live on secure cloud infrastructure, that provides a real time, local government level picture of conditions on the ground. It is already operational across Nigeria, Ghana and Senegal, covering more than 700 administrative areas, and is designed to scale to all fifteen ECOWAS member states. It draws on live data from the European Copernicus (Sentinel-1 and Sentinel-2) satellites, NASA, the World Bank and UNICEF.

The proposed partnership. We will provide the Commission a dedicated regional dashboard with a consolidated view across member states, configured for the relevant departments, beginning with a complimentary pilot over the states already live and extending to others by agreement. Each member state's data remains isolated and secure, while the Commission gains the region wide picture its mandate requires.

What the platform offers the Community:

- **Regional food security and agriculture:** satellite monitoring of crop health, AI crop disease diagnosis and market price intelligence, in support of the ECOWAS Agricultural Policy.
- **Disaster early warning:** flood and drought detection from satellite radar that sees through cloud cover, across borders.
- **Conflict and displacement early warning:** 24 to 72 hour prediction of flashpoints that drive cross border displacement, complementing the Community's early warning network.
- **Poverty and population mapping:** settlement level population and vulnerability from satellite data, to target regional programmes.
- **Humanitarian coordination:** a shared view of agency coverage across member states, to reduce duplication and close gaps.

- **Regional oversight:** a single dashboard with per member state breakdowns and automated periodic reports.

The platform also delivers alerts directly to communities through multilingual SMS, in English, French and Portuguese, reaching citizens without smartphones through partner agencies. This aligns naturally with the Community's linguistic and humanitarian reach.

We would be honoured to give Your Excellency or the relevant departments a live demonstration at your convenience. Kindly nominate a focal point, and we will provide guided onboarding and a regional pilot immediately.

Please accept, Your Excellency, the assurances of our highest regard.

Yours faithfully,

A handwritten signature in blue ink, appearing to read 'Abdullahi Zuru Ibrahim', with a stylized flourish at the end.

Abdullahi Zuru Ibrahim
